TROPICAL CYCLONE BULLETIN NO. 10

Tropical Storm "ISANG" (OMAI)

Issued at 5:00 PM, 21 August 2021

Valid for broadcast until the next bulletin at 11:00 PM today

TROPICAL CYCLONE WIND SIGNALS IN EFFECT

No Tropical Cyclone Wind Signal is currently in effect.

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

"ISANG" is unlikely to directly affect the weather condition and bring heavy rainfall in the country throughout the forecast period.

Severe Winds

The latest forecast scenario for "ISANG" shows that the hoisting of Tropical Cyclone Wind Signals over any land area in the country remains unlikely. Moreover, its passage is unlikely to enhance the Southwest Monsoon and bring gusty conditions to the country.

HAZARDS AFFECTING COASTAL WATERS

In the next 24 hours, Tropical Storm "ISANG" remains less likely to cause sea conditions within the coastal waters of the country which may be risky to any type of sea vessel.

TRACK AND INTENSITY OUTLOOK

- "ISANG" will remain far from the Philippine landmass throughout the forecast period. The tropical storm is forecast to move generally northwestward today through tomorrow morning and turn north northwestward tomorrow afternoon over the East China Sea. It will then move northward on Monday early morning and north northeastward in the afternoon. On the forecast track, "ISANG" is forecast to exit the Philippine Area of Responsibility tomorrow morning or afternoon.
- This tropical storm is forecast to intensify into a severe tropical storm tonight or tomorrow early morning, after which it is likely to reach its peak intensity. A weakening trend may commence by Monday morning.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless an intermediate bulletin is released, the next tropical cyclone bulletin will be issued at 11:00 PM today.
